9. ☐ Other _____.

Reasons for allowance

1. This communication is in response to applicant's 11/15/2004 Amendment in the application of Passman et al. for an "Using direct cluster member to cluster member links to improve performance in mobile communication systems" filed 09/12/2000. The proposed amendments have been entered and made of record. Claims 29-31 have been canceled per Applicant's request, and new claims 32-41 have been added. Claims 1-17, 19-25 have been amended. The claims have been amended to more particularly point out and distinctly claim the invention.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Edward A. Gordon (Reg. #54130) on April 22, 2005.

3. The application has been amended as follows:

IN THE CLAIMS:

Claim 39: line 1, replace "claim 33" with --claim 38--

Claim 41: line 2, replace "claim 36" with --claim 40--

Cancel the withdrawn claims 18, 28.

Art Unit: 2665

4. Claims 1, 15-17 and 7-14 and 19-27 and 32-36, 2-6, 37 and 38-41 are allowable as evident by applicant's amendment (Claims are renumbered as 1-36 respectively)

5. The following is an examiner's statement of reasons for the indication of allowable subject matter: The closest prior art of record, either singularly or in combination, fails to disclose or suggest an electronic processor circuit configured to determine the strength of a signal received from a second communication station through said transceivers, and determines whether to communicate with the second communication station directly or to communicate with the second communication station by routing messages through a cluster head affiliated to said first mobile communication station based on the signal strength; communicates with the second communications station directly when the RSSI of the second communication is greater than the RSSI of the affiliated cluster head plus an additional value, as specifically recited in the claims. The instant invention, in combination with the other claimed features, improves upon the Prior Art by providing a method and system for using direct cluster member to cluster member links to improve performance in mobile communications systems.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2665

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.

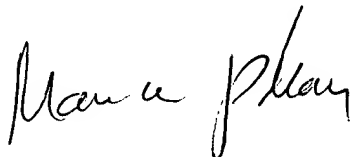

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy Vu can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
